

International Conference on Malignant Lymphoma **Lugano**

17–21 June 2025

Abstract keywords (min 1 – max 3)

Basic and Translational Science	 Bioinformatics; Computational and Systems Biology Genomics, Epigenomics, and Other -Omics Metabolism Microenvironment Patient-Derived Xenograft (PDX) Models Risk Models Tumor Biology and Heterogeneity Other
Cancer Health Disparities	
Diagnostic and Prognostic Biomarkers	
Experimental Therapeutics	 Cellular therapies Chemotherapy Molecular Targeted Therapies Combination Therapies Immunotherapy Radiation Therapy Targeting the Tumor Microenvironment Other
Imaging and Early Detection	 PET-CT Liquid biopsy Minimal residual disease Other
Late Effects in Lymphoma Survivors	
Lymphoid Cancers	 Aggressive B-cell non-Hodgkin Lymphoma Aggressive T-cell non-Hodgkin Lymphoma Canine Lymphoma as a Surrogate Chronic Lymphocytic Leukemia (CLL) Cutaneous non-Hodgkin Lymphoma Extranodal non-Hodgkin Lymphoma Hodgkin Lymphoma Hodgkin Lymphoma (Paediatric, Adolescent, and Young Adult) Indolent non-Hodgkin Lymphoma Multiple Myeloma Non-Hodgkin Lymphoma Non-Hodgkin Lymphoma (Paediatric, Adolescent, and Young Adult) Other

Lymphoma nursing	 Impact of New Therapies on Patient Care Education and Training Outpatient Developments and Ambulatory Care Patient Safety and Standards of Care Quality of Life, Late Effects, Survivorship Care Symptom Management and Supportive Care Patient and Family-centered Care Transition from Paediatric to Adult Care Care of the Carer (Healthcare Team and Caregiver)
Pathology and Classification of Lymphomas	
Prevention and Cancer Interception	
Therapeutics and Clinical Trials in Lymphoma	 Cellular therapies Chemotherapy Molecular Targeted Therapies Combination Therapies Immunotherapy Radiation Therapy Stem Cell Transplant Targeting the Tumor Microenvironment
Ongoing Trials	Other
Other
